## Summary

---

I am an emerging and dedicated Front-end developer with **1+ year of experience**. I have hands-on experience with modern frameworks and state management tools such as React.js, Next.js, Redux, Redux Toolkit, Zustand, and TypeScript in both React.js and Next.js environments.

## Experience

---

Limsa (Frontend developer) 08.2024 – present

- Designed a user-centric **admin panel** with an intuitive interface for efficient data and operations management. Integrated role-based access control to enforce structured user permissions. Worked closely with backend developers to refine REST API contracts, enhancing data flow and minimizing API load times with caching strategies.
- Enhanced the **eCommerce** management system by implementing advanced sorting, filtering, and search functionalities for better product discovery. Integrated real-time data updates to ensure seamless inventory and order tracking. Implemented token-based authentication with role-based access control to enhance security and streamline user permissions.
- Developed a responsive **CRM** using Ant Design and Tailwind CSS, integrating dynamic search and CRUD operations for efficient data management. Enhanced user experience with real-time filtering, intuitive navigation, and optimized performance across all devices. Implemented interactive UI components to streamline workflows and improve usability.

Getter IT Innovation company - Intern 04.2024 – 07.2024

- Developed a web-based event management platform with an intuitive and responsive user interface, ensuring seamless accessibility across various devices. Implemented modern UI principles to enhance user experience and engagement.
- Implemented core functionalities such as secure user authentication (registration & login), event categorization, sorting, and filtering to simplify event discovery. Built an admin panel and user profile management system using React and modern UI libraries for efficient content control.
- Optimized performance and SEO by utilizing Next.js in the production phase, ensuring fast loading speeds and improved search engine visibility. Integrated lazy loading, code splitting, and other best practices for a high-performance web experience.

## Skills

---

**Programming Languages:** JavaScript.

**Technologies/Frameworks:** ReactJs, NextJs, Tailwind CSS, Bootstrap, MUI, Ant Design, Framer Motion, Trillo, Redux, Redux-Toolkit, HTML5, CSS3, Zustand, React-hooks, Git.

**Languages:** Uzbek (Native Speaker), English (Intermediate).

## Education

---

Tashkent State University of economics (Economist) 08.2020 — present

Najot Talim (Frontend, ReactJs) 09.2023 — 04.2024
